

## ABOUT AMADEUS

Amadeus Software is the leading UK SAS consultancy company. Our Technical Centre is centrally located at the Oxford Science Park and we have been providing SAS services including consultancy, training and support for over 20 years. We have a unique company culture, with an emphasis on teamwork, quality solutions, integrity, flexibility and fun.

A selection of our customers include: Waitrose, Roche Products Limited, Department for Work and Pensions, Santander, Which?, Money Supermarket and Office for National Statistics.

## At Amadeus we

- Gather data from data sources into a single place
- Produce reports, summaries and information from the data we gather
- Build software tools helping people in business help themselves
- Educate people in business to use SAS effectively
- Support people using SAS and their software tools for the long term

## What is SAS Software?

SAS is a Business Intelligence Software and is used by our customers to improve performance, increase profitability, reduce costs and optimise opportunities for growth. SAS solutions are used at 44,000 sites in 108 countries – including 91 of the top 100 FORTUNE Global 500<sup>®</sup> companies.

## What we are looking for?

We are looking for qualified graduates with a degree in Maths or Science disciplines. Motivation, drive and enthusiasm to learn new technologies are essential. You should be willing to travel and be able to work within a team as well as be self-motivated and able to work independently.

## What we offer?

The majority of our work involves the development of bespoke windows and web applications for data warehouses and training customers how to use SAS software.

Successful graduates will be taken through our extensive training program and will work alongside our technical team on consulting/development projects and delivering training courses when experience has been gained.

Amadeus Software Limited believes that employees are key to our business success. We recruit motivated individuals who are creative and excellent communicators. In return we offer a unique working environment, training and access to the latest technologies, management support and the ability to impact the future success of the company.
