

## ABOUT AMADEUS

Amadeus Software is a leading SAS Consultancy with a global reach. Our consultancy projects offer a variety of experiences from installation, through data integration, business intelligence, analytics and application development. Our customers are wide and varied; from globally recognised organisations, through to specialist small companies.

## PRINCIPAL CONSULTANT - JOB DETAILS

Amadeus Software wishes to expand our technical team capability with a further Principal Consultant.

As a technical authority and thought leader, you will work in collaboration with your colleagues to deliver projects and continually refine Amadeus' Training and Support propositions.

Your primary duties and responsibilities will include:

- To act professionally and as an ambassador for Amadeus Software;
- Provide technical oversight and problem solving;
- Perform ongoing study of industry developments;
- Train and mentor technical staff;
- Perform implementation on customer projects;
- Promote awareness to colleagues of new SAS developments, emerging industry standards and other vendor developments impacting SAS;
- Provide input to the development of training materials;
- Conduct customer training courses, seminars and workshops;
- Represent Amadeus with technical papers at conferences and special interest groups;
- Perform project management tasks;
- Provide strategic advice to customers and prospective customers;
- Maintain a minimum of SAS Institute's Advanced Certification.

## JOB REQUIREMENTS

Suitable applicants will be qualified with the minimum of a BSc (Hons) degree in a numeric or scientific discipline. A minimum of seven years SAS experience is required. You may already have achieved Base or Advanced SAS Certification. Direct experience of SAS Customer Intelligence, Risk Management or Marketing Automation is advantageous.

## IN RETURN

Amadeus offers an excellent remuneration package. Our working environment, located near the desirable city of Oxford is quite unique. This is an excellent opportunity to work with the best SAS products and even position yourself as a key figure in the SAS industry.
