

UK Retail Supermarket Case Study

SAS 8 TO 9 MIGRATION WITH ORACLE AND DB2 TO TERADATA

The Challenge

This customer had a suite of existing SAS applications, for which the data sources were being migrated from Oracle and DB2 to a new Teradata data warehouse. These applications needed to be converted appropriately, in order to remain available to Business Intelligence users.

The Solution

Data requirements for each application were examined in detail, and mapped to the data warehouse. Applications were partially redesigned where necessary, modified and formally tested. The technologies used included SAS/Base, SAS/AF, SAS/EIS, SAS/Macro, SAS/Stat, SAS/Graph, SAS/Connect and SAS/Access to DB2, Oracle and Teradata.

The Results

All the applications concerned were successfully converted on schedule, now using data from the new data warehouse. Availability of these applications to the business users was not interrupted.

ABOUT AMADEUS – The SAS Specialists Amadeus Software Limited, formed in 1989, provides Business Intelligence Solutions. We are a SAS9 Preferred Implementation Partner for delivery of SAS projects across all industries. We have earned our outstanding reputation by providing first-class solutions, unrivalled technical support and clear, practical training. We achieve this by remaining at the forefront of Business Intelligence technology and providing solutions that meet customer objectives. Our Project Management is structured to provide pragmatic quality assurance ensuring successful delivery.
